User Stories

#Projects

[EatIt Meal Prep Website](#)

This is an online store for a meal prep company EatIt.

- My Role:** I am responsible for the entire app, (Creating wireframes, user stories, ORD's, etc), Front-end development, Back-end development.
- Technologies used:** Angular, Bootstrap, Firebase hosting and Firestore.
- Challenges and learning:** This is an ongoing project, but so far the hardest part is learning and understanding Firebase and how to work with it.

[Client Management Panel](#)

A client management system which keeps track of personal information, and the balance owed by a client.

- My Role:** Front end development
- Technologies used:** Angular/Typescript front end, Firebase back end & hosting.
- Challenges and learning:** My main challenge with this project was learning how to integrate and use Firebase, as this was my first time attempting to use it.

[Bob's Computer Repair Shop](#)

This is a group project from when I was studying full stack web development at Bellevue University. It is a "Computer repair shop" application where customers can create their own accounts, place orders, view invoices, and manage their profile.

- My Role:** Helped in project planning (Creating wireframes, user stories, ORD's, etc). A lot of back end development, I wrote a good chunk of the API's. I also did a good chunk of the front-end code for the UI.
 - For this project I am responsible for:** The back end and front end of the Login component, User management component, home page, and user profile page, and password recovery component. I also am responsible for the router & auth guard, and error interceptor.
 - Technologies used:** MEAN stack, Heroku, Angular Material.
 - Challenges and learning:** I learned a lot about writing API calls, learned a lot about managing and storing data, and learned how to work in a SCRUM / Agile environment as part of a dev team.
-

#Education

Bellevue University / Bachelors in Full-Stack Web Development

2011 - 2019 : Online classes

Udemy / Completion Certificate for “[Angular 8 – The Complete Guide \(2020 Edition\)](#)” by Maximillian Schwarzmuller
